PROFILE SUMMARY

React Native Mobile Developer with over 2 years of experience in designing, developing, and maintaining mobile apps for both iOS and Android platforms. Proficient in web and mobile app development, with a strong focus on user-centered design and high-quality coding. Adept at working independently and collaborating with clients to deliver high-quality, user-friendly mobile apps.

EDUCATION

Caleb University, Lagos

07/2022

BSc Computer science; Second Class Upper

TECHNICAL SKILLS

Mobile App Development: React Native

Web Technologies: Redux, React Hooks, React Query, Express.js, Tailwind, Zustand

Design Prototyping: Figma

Version Control: Git

Testing: Postman

Cloud Computing: DigitalOcean

Database Management: MongoDB, Firebase

Development Tools: Visual Studio Code, Android Studio

Other skills: Mobile UI/UX Design, Application Architecture, Debugging, App Performance Optimization, RESTful API Integration, Cross-Platform Development, App Store Deployment, Agile Development, Client Collaboration

WORK EXPERIENCE

Freelance Mobile App Developer

11/2021 – Present

- Develop, design, and deliver mobile apps for clients, ranging from small businesses to startups, across various industries.
- Collaborate with clients to define project requirements, objectives, and scope, ensuring clear communication and alignment on project goals.
- Create user-friendly and visually appealing user interfaces to enhance user engagement and overall user experience.
- Implement agile development methodologies to efficiently manage project timelines and meet client expectations.
- Integrate third-party APIs and services to enhance app functionality, including social media integration, payment gateways, and geolocation services.
- Conduct testing and debugging to identify and resolve any issues, ensuring high-quality software development.
- Deploy apps to the Apple App Store and Google Play Store, following all guidelines and requirements.

Intern

Alabian Solutions

05/2021 – 10/2021

- Collaborated with team members to analyze and modify an agro products management website, contributing to the improvement of the platform's functionality.
- Conducted thorough testing of applications to ensure issue resolution before the final review, ensuring the delivery of high-quality software products.
- Worked closely with web designers to create user interface designs, enhancing the user experience of web applications.
- Collaborated with development teams to build a React Native-based dating application, showing adaptability in working with diverse technologies.
- Produced user documentation using Microsoft PowerPoint to elucidate the functionality of an insurance website, ensuring that end-users could effectively navigate and utilize the platform.
- Provided mentorship to interns, instructing them on fundamental frontend technologies, demonstrating leadership and a willingness to share knowledge with others.

RECENT PROJECTS

Tripflex

May 2023 – Present

- Led a mobile app development team in the creation of a ride-sharing application.
- Collaborated with the team to brainstorm and analyze project strategies.
- Utilized technologies like React Native, React Hooks, React Query, Zustand, and Git.

Highmart

May 2022 – Present

- Co-founded and developed a full-stack e-commerce app, enabling students to buy and sell items using their mobile phones.
- Collaborated with UI designers and team members to drive project innovation.
- Engaged with stakeholders for potential investments in the platform.
- Utilized technologies including React Native, Redux, Express, MongoDB, Digital Ocean, Postman, and Git.

Google Play Store: <https://play.google.com/store/apps/details?id=com.highmart.myapp>

Apple Store: <https://apps.apple.com/ng/app/highmart/id6470394460>

Jugger-alert

July 2023

- Developed an open-source React Native alert dialog library that garnered 431 downloads on npm.

HERfessions

February 2023 – May 2023

- Collaborated with another developer to build an anonymous platform supporting victims of sexual abuse.
- Employed technologies including React Native, Redux, Tailwind, Firebase, and Git.

Ordaily

December 2021 – March 2022

- Initiated a solo project to create a speech-to-text reminder app, drawing inspiration from Behance designs.
- Leveraged technologies such as React Native, Git, Firebase, and Redux.

Quick-readme-template

January 2022

- Created a customized readme template with over 20 downloads.
